

Ad-hoc Press Release

Zurich, April 13, 2021

All Portuguese photovoltaic projects ready to build

The Palmela municipality east of Lisbon issued a building permit on April 12 for the 49.4 MW Poceirão photovoltaic plant, thus granting it RTB (ready to build) status.

This means that the following four Edisun Power projects, with a total capacity of 156 megawatts, have now reached the ready-to-build stage: The 23.4 MW Betty plant in northeastern Portugal, which is situated in close proximity to the existing 49.0 MW Mogadouro plant, as well as three plants located east of Lisbon, namely Sabugueiro (49.4 MW), Quinta da Seixa (33.8 MW) and Poceirão (49.4 MW).

Edisun Power is thus well on its way to expanding its portfolio.
